A line graph with a wavy, fluctuating line. The line starts at a low point, rises to a peak, falls to a trough, rises to a higher peak, falls to a lower trough, rises to a third peak, falls to a fourth trough, and finally rises to a fifth peak. The peaks are at approximately x-coordinates 1, 3, 5, and 7, while the troughs are at approximately x-coordinates 2, 4, and 6. The line ends at a high point on the right side of the graph.
